Chuck Holland and Paul Ortiz Will Answer Your Questions

Communication services in Laguna Woods Village continue to benefit from upgrades under the Village Management Services (VMS) team. Among the newest are the completely-rebuilt Village website (still being tweaked for best usability), the DwellingLive web-based portal for resident use, and a new whole-home DVR service being rolled out by Village Television.

As you'll learn on May 17, the faster Internet speeds and TV programming improvements (including exciting new opportunities for resident programming) which we've already experienced are just part of an evolving communications picture.

Find out what's happening and what's ahead — and make your opinions known when Chuck Holland, Village Management Services' Information Technology Director, and Paul Ortiz, Village Television's General Manager, address our next General Meeting.

For more information, contact Steve Carman, steve.carman@mac.com, 424-254-6583.

GENERAL MEETING *Open free to members, residents, and their guests*

Thursday, May 17, 2018
