Want to learn the easiest way to produce a video on your iPhone, iPad or Mac? Then come learn how to make an iMovie Trailer. Just select and tap your video and photos, add titles and text, and iMovie does the rest. A number of different templates and themes are available. In the first class we will produce a trailer about living in Laguna Woods, so feel free to bring your own photos and videos or use the material provided. The second class will focus on fine-tuning your projects and showcasing your work.
