

The Importance of Creativity Throughout our Lives

Cyndee Whitney, Ph.D.

How we are introduced to creativity as children impacts how we approach problem-solving and creative decision-making throughout our lives. Whether it is in a learning or business environment, or navigating the complex decisions required in retirement, examining creative solutions will produce better outcomes. We'll look at how remaining open to creative possibilities serves us at every stage of life.

Well known to viewers of Village Television as the host of "Discovering Laguna Woods Village," Cyndee Whitney holds a Ph.D. in human and organizational systems from Fielding Graduate University. She worked in human development for Disney Consumer Products and also served as Director of Artist Development for Disney, where she managed training and recruiting and developed an apprenticeship program. Before that, she was a Disney character animator on such films as "The Little Mermaid" and "The Great Mouse Detective."
