Drones: All You Need to Know

GENERAL MEETING *Open free to members, as well as residents and their guests*

Thursday, May 16, 2019 – in the Video Lab

Located inside Gate 12 between Clubhouse 2 and the pool

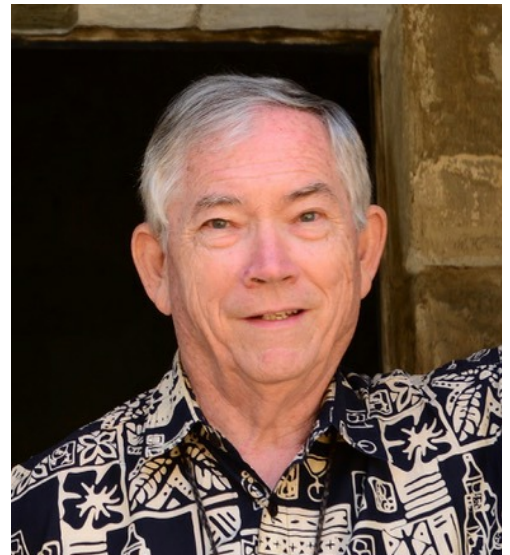

6:30 pm - Snacks & Socializing
7:00 pm - Program

Speaker:

LARRY CUNNINGHAM

Resident Larry Cunningham draws on his extensive background in aerial photography as he tells us about the new photographic uses of drones. Join us to learn what you can and cannot do taking drone video, especially the regulations in our community.

Styling himself “**Larry Cunningham, Night Photographer,**” our May speaker’s photography career begins in the Air Force as a photo reconnaissance officer during the Vietnam war. During that time, his lab was processing high-altitude imagery that supported multi-force daily intelligence operations. After the Air Force, Larry was introduced to high-speed, high-resolution digital imagery with multiple space-based platforms. “This would be 30 years before the iPhone,” Larry points out.

*This will be our last General Meeting until September 19. **A summer BBQ is planned on Thursday, July 18,** outdoors in the new park area next to the Video Lab -- with its gorgeous mountain view. **Details to come!** For more info, contact Steve Carman, steve.carman@mac.com, 424-254-6583.*
